

In attendance: Rich Philips, Nick Seifert, Amanda Carlson

Nick talked to Kenny at the MVS and he did not seem very interested. Need to reach out to him about this once we have more details on price. If we could pay this would he be OK having it there?

Amanda got a few quotes. One level 2 was \$12k, one was \$15k, another was \$8k. One level 3 charging station quote, \$57.5k without pricing for any 3-phase interconnect; that includes 5 years of the charging service.

Rich reached out to Jacob, but he hasn't received these back yet. He will send those along once he gets them. He was going to quote installation for both a level 2, and for a level 3.

Nick to speak to the selectboard on Tuesday. Things to mention:

- Grant can be spent within 2 years.
- Need to have monies committed prior to application.
  - Can the selectboard put up \$1k without a town meeting vote?
- Mention that we're looking at both level 2 and level 3
  - Level 3 would mean a different group of folks.
- The town can perform "in kind" work that can count towards this.

Nick to send email about when to meet next on this (next week).
